<b>Danise Rapetti</b> , Professor, Nursing	√	
<b>Joshua Sigman</b> , Front End Web Developer	√	
<b>Michael Smedshammer</b> , Course Design Coordinator	√	
<b>John Zamora</b> , Professor, Computer Science	√	

**I. Call to Order/Introduction**

Al Alt called the meeting to order at 2:07pm.

**Action Item:**

**II. Review and Approval of Minutes – 9/20/16, 10/04/16, 11/15/16, 12/06/16, 01/10/17, and 02/21/17.**

**John Zamora moved to approve the minutes from 9/20/16, 10/04/16, 11/15/16, 12/06/16, 01/10/17 and 02/21/17.**

**Ellen Dambrosio seconded that motion.**

**Motion passed.**

**Informational Items:**

**III. IELM Technology Requests**

Al Alt reiterated that CTC had a special meeting on 1/10/17 where Resource Allocation Council asked College Technology Committee to review the technology requests. These requests were reviewed and sent back to RAC with CTC's approval. RAC is asking CTC to look at some larger requests including "smart classrooms". They would potentially like to standardize all "smart" areas with CTC. Al also advised that technology quotes were coming along a little slower due to a loss of an IT position and Patrick Pimentel being out until the end of March. Fortunately, these are not a huge rush as funding of IELM is not categorical and can roll over into the next fiscal year. The technology items may end up aligning with summer installations.

**IV. Technology Compression Planning Finalization**

The committee continued to revise the Technology Plan and added a timeline.

**V. Standing Reports:**

**A. Michael Smedshammer, Distance Education**

Distance Education Committee meets tomorrow. They will be initiating a wait list situation conversation.

In the process of testing Vericite over Turnitin.com. Looking into the host site for in person testing to identify online students.

All items being promoted in the on-line program are being addressed.

**B. Joshua Sigman, Front End Web Developer**

The new student portal process is quicker than expected. However, the technology is more limited than we had hoped. The portal is a nice gateway in itself toward single sign-on but won't provide single sign-on at this time.

Starfish has a registration process under development but is not yet compatible with Elucian. There is no time line at this point.

In addition to developing the portal, also developing a mobile portal with a soft roll-out in May or June.

Once these projects are up and running, the President has asked for a cosmetic re-design of the MJC website which will be more toward outward facing and focusing more on marketing.

**C. Patrick Pimentel, Sr., Technology Services**

Not available for a report out at this time.

**Next meeting:** March 21, 2017 2:00pm – 4:00pm,  
Center for Advanced Technologies, 262
