1. 2021-2026 Guided Pathways Proposed Goals

A backwards design exercise with a four to five year goal was reviewed. The document was created by the Guided Pathways Steering Committee to address contextualized learning and teaching. Pit Crew members discussed the creation of courses and suggested methods of assessment. The Cohort Based Professional Development and Community of Practice (cross discipline) will be similar to Online Education’s approach. Faculty will be trained for a couple of weeks, assigned deliverables, and participate in a community of practice that meets regularly to discuss their experiences creating and teaching the curriculum. Student Learning Outcomes will be addressed institutionally, with the lead coming from the Student Equity Committee and Academic Senate.

The timeline was reviewed and a suggestion was made to possibly partner with the Stanislaus Office of Education (SCOE) and Modesto City Schools. To invite K-12 faculty members to learn about contextualized teaching. Some members voiced concern that the timeline was too long. Suggestions made on how to shorten the time line included working with First Time in College (FTIC) faculty, moving Diego Navarro’s workshop to early summer 2022, and running the pilot in early May 2023. Work may also be done simultaneously or bumped up.

2. SSIIPP Reflection: “Strategic”

As time ran short, the SSIIP will be addressed at the next PIT Crew meeting. Members were invited to review the documents, which would be emailed after the meeting, with the goal of discussing one topic during each of the next five PIT Crew meetings.

Meeting ended at 9:55 am.

Next meeting: Thursday, October 28, from 8:30 am to 9:45 am
